Team Training

Strengthen the capabilities of your academic and administrative team with specialized, practical, and contextualized training.

The transition to virtual education is not just about technology—it's about people prepared to use it with purpose. Having a well-trained team not only improves learning quality but also optimizes processes, strengthens institutional culture, and enhances the educational experience

n digital environments, every role—teacher, tutor, coordinator, administrator— requires specific skills to teach, support, and manage effectively.

Investing in continuous training means investing in educational sustainability, real innovation, and institutional growth. A trained team turns tools into transformative experiences.

WHO IS THIS TRAINING FOR?

Teachers and facilitators who want to teach confidently in virtual environments.

Academic coordinators and tutors who need to master tools and strategies for learner support.

Administrative staff responsible for managing users, platforms, and data within LMS systems.

WHAT DOES THE TRAINING INCLUDE?

Through our **Virtual Learning Complex CIDCLearning Pro**, we offer:

- **Role-specific learning paths** (for teachers, tutors, administrators)
- **Micro-courses** focused on mastering EdTech tools and teaching strategies
- **Active methodology** and progressive scaffolding
- **100% online access** with tutors, peer community, and certification
- **1 free demo course** in each category

💻 MODALITY

— Fully online training

— Flexible and self-paced

— Accessible from any device

— Professional certification issued by CIDCLearning

EXPECTED IMPACT

🎯 Your team will be prepared to:

- Effectively manage virtual learning processes
- Facilitate learning with up-to-date tools and approaches
- Support learners with a strong pedagogical foundation
- Contribute to a human-centered and efficient learning experience

"Education does not change the world. It changes the people who are going to change the world."

—Paulo Freire
